

1. Design suitable data structures and implement pass-I of a two-pass assembler for pseudo-machine in Java using object oriented feature. Implementation should consist of a few instructions from each category and few assembler directives. Implement Pass-II of two pass assembler for pseudo-machine in Java using object oriented features.

2. Write a program to simulate CPU scheduling algorithms: FCFS , (Preemptive), Round Robin (Preemptive)

3. Design a paper prototype for selected Graphical User Interface.(whatsapp app with atleast with 5 screen using paper and Figma/Canva tool and write observation table.(Interaction Styles, Input and Output)

Sr. No	Principles	Achieved	Justification
1	--	--	--

Sr. No	Element	Observation	Improvement/ corrections
1	--	--	--

4. Write a Java program for pass I and pass-II of a two-pass macro-processor. The output of pass I (MNT, MDT and file without any macro definitions) should be input for this assignment.

5. Design a paper prototype for selected Graphical User Interface.(Insta app with atleast with 5 screen using paper and Figma/ Canva tool.and write the observation table for all elements. Interaction Styles, Input and Output)

Sr. No	Principles	Achieved	Justification
1	--	--	--

Sr. No	Element	Observation	Improvement/ corrections
1	--	--	--

6. Write a program to simulate page replacement algorithms using Least Recently Used (LRU).

7. Implement GOMS (Goals, Operators, Methods and Selection rules) modeling technique to model user's behavior in given scenario

Goal: Select an item and Add it to cart

8. Write a program to simulate CPU scheduling algorithms: FCFS, SJF (Preemptive)

9. Write a program to simulate page replacement algorithms using F I F O .

10. Implement GOMS (Goals, Operators, Methods and Selection rules) modeling technique to model user's behavior in given scenario

Goal-Delete the Mail.

11. Write a program to simulate CPU scheduling algorithms Priority (Non-Preemptive) and Round Robin (Preemptive)

12. Bankers Algorithm (Deadlock Avoidance Algorithm)

13. Write a program to simulate page replacement algorithms using optimal algorithm

14. Implement GOMS (Goals, Operators, Methods and Selection rules) modeling technique to Model user's behavior in given scenario.

GOAL: CLOSED WINDOW.

15. Design a paper prototype for selected Graphical User Interface.(E-Commerce website with atleast with 5 screen using paper and Figma tool\Canva Tool and write the observation table for all elements. Interaction Styles, Input and Output)

Sr. No	Principles	Achieved	Justification
1	--	--	--

Sr. No	Element	Observation	Improvement/ corrections
1	--	--	--

16. Design a paper prototype for selected Graphical User Interface.(Amazon website with atleast with 5 screen using paper and Figma tool\ Canva Tool and write the observation table for all elements. Interaction Styles, Input and Output)

Sr. No	Principles	Achieved	Justification
1	--	--	--
